imageRUNNER ADVANCE
TECHNOLOGY REACHES NEW HEIGHTS

Cloud computing is gaining acceptance with more and more companies across the globe. Businesses today look to Cloud computing for on-demand scalability. Costly infrastructure, setups and administrative burden are a thing of the past with proper implementation of Cloud Computing technology.

Canon's imageRUNNER ADVANCE maximizes office productivity by allowing users to access Cloud services right from imageRUNNER ADVANCE devices. Users can scan and store their paper documents, or choose to retrieve and print their documents stored in their Cloud service.

Scan-to-Cloud and Print-from-Cloud is simple with Canon's imageRUNNER ADVANCE - all that is needed is an imageRUNNER ADVANCE multifunctional device (MFD); no drivers, additional software or personal computers are required. With the Cloud Scan and Cloud Print support of Google™ Docs and Microsoft™ SharePoint Online, imageRUNNER ADVANCE systems are the perfect way to scan and print through Cloud services.

Important Note:

* *Machine upgrades may be required to support Google™ Docs and Microsoft™ SharePoint Online Cloud services via the imageRUNNER ADVANCE devices. Internet connectivity is required.*

** *Users of Google™ Docs and Microsoft™ SharePoint Online Cloud services are advised to evaluate the benefits and risks of Cloud services and their data security needs.*

*** *Availability of the Google™ Docs and Microsoft™ SharePoint Online Cloud services on the imageRUNNER ADVANCE devices varies by country or region. For more information, please contact your local Canon Sales Office.*

ADVANCED
USABILITY AND CONVENIENCE

Meet the multifunctional device that is optimized for convenience and speed - your way.

8.4" screen

Intuitive User Interface

The new imageRUNNER ADVANCED 4000 interface provides you with a more pleasant navigation experience on an 8.4" full color, high-resolution TFT touchscreen.

Configurable Quick Menu

Complex, frequently used settings can be easily configured to run at the touch of a button. This streamlines every individual's workflow and increases productivity by letting you accomplish more in less time.

Plug and Print Capability

With standard USB input and optional media connectivity options such as Secure Digital (SD) or CompactFlash (CF) Cards, you can walk up to any imageRUNNER ADVANCE 4000 series with your thumbdrive or memory card to scan and print on the spot.

Innovative Toner System

To maintain the ongoing productivity of your business, the imageRUNNER ADVANCE 4000 series features a toner system that can be replaced - even when your device is delivering printouts.

ADVANCED PRINT QUALITY

Quality prints that truly shine.

Genuine Adobe Postscript 3

The imageRUNNER ADVANCE 4000 series supports Genuine Adobe PostScript 3 printing capability, enabling you to deliver the desired output quality without worrying about font compatibility. True PostScript capability also means seamless collaboration with PostScript workflows for faster and higher quality prints. You will also enjoy direct PDF printing and full support of Adobe fonts.

ADVANCED imageCHIP System Architecture

To meet and exceed the demands of today's businesses, Canon has developed a dual processor system. The image processor board works with the scanner, adjusts images, and ensures superior image quality and ultra-fast processing. The information processor board controls user interface and coordinates device networking and connectivity. The result is higher quality printouts with lesser wait.

High Resolution Brilliant Printouts

Combine the E-drum technology and QF Toner, which utilizes less heat and energy, and you will get sharp, vivid printouts at high speed with better image consistency. Enhance it with an intelligent controller, and the imageRUNNER ADVANCE 4000 brings you the crispest black and white printouts.

ADVANCED
PRODUCTIVITY

Advanced technology becomes simple with the Canon imageRUNNER ADVANCE. Simply add the modular units you need to further extend the functions of your device.

High Paper Capacity

High print count operations will benefit from the high capacity of an optional Paper Deck Unit. Paper Deck-B2 adds an additional 2,700 sheets of A4 that translates to lesser time spent on paper loading and longer uptime for critical print jobs.

Professional Looking Documents

With Canon's optional accessories, it is easy to impress and inspire with professional-grade reports and presentations. Simply select the settings you want, ranging from automatic stapling, punching, collating and even booklet creation functions. For a compact footprint, internal stapling and collating units are also available as options.

High Speed Scanning

Using the optional document feeder, you can archive your documents and create up to 100 crystal-clear reproductions of black & white and color documents each time you press the button. What's more, at a speed of 51ipm in black & white or color, you no longer need to spend as much time waiting at the device.
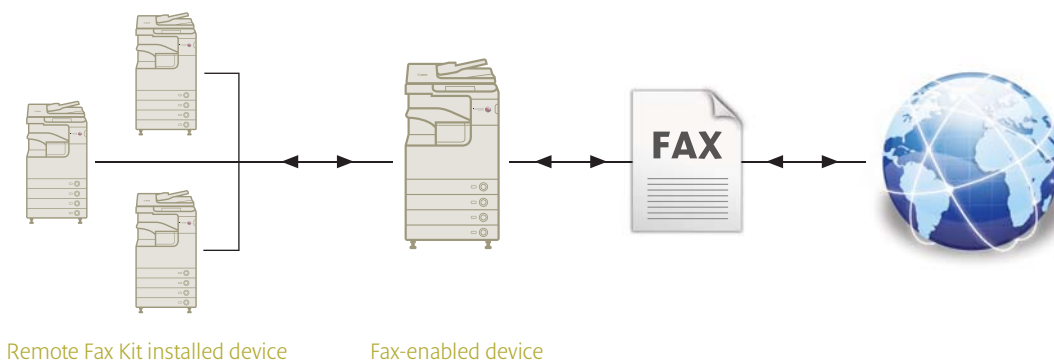

4-Line Fax

The imageRUNNER ADVANCE 4000 series supports optional Super G3 fax functionality for high-speed fax transmissions. The 4-line fax feature is capable of handling large volumes of fax documents, while ensuring lesser busy signals and greater connectivity. You can also save cost and space by consolidating multiple fax devices into one shared device.

Remote Fax Collaboration

With the optional Remote Fax Kit, you can also fax through other fax-capable imageRUNNER ADVANCE devices in the network, even if the one you are using does not have a fax-board installed. This means significant cost-savings and convenience.

ADVANCED DOCUMENT WORKFLOW

A healthy document workflow means a healthy business. With imageRUNNER ADVANCE 4000 series, you will find the most advanced, yet simple workflow.
Scan and Send

In one simple operation, you can distribute scanned documents to multiple destinations, such as email, fax destinations and network folders. The wide range of formats include standard High Compression PDF, Adobe PDF Reader Extensions, Searchable PDF, Encrypted PDF and XPS.

Advanced Box

Canon's new built-in document sharing solution simply makes sense. Multiple users can collaborate easily on a shared folder and access files from PCs or other networked imageRUNNER ADVANCE systems. Personal folders are also available for more sensitive documents. What's more, you can also preview the documents before printing them.

Share stored documents

Built-in HDD Storage

Save documents from PC

Scan documents

Receive documents by fax

iW Function Flow

iW Function Flow is an imageRUNNER ADVANCE series core MEAP application that can transform time-consuming, multiple step tasks into simple workflows for each user. Scanning, e-mailing, faxing, and archiving can be done in one operation, all from a single button on the device control panel.

MEAP Connectors

MEAP Connectors bridge your Canon imageRUNNER ADVANCE and enable communication with external storage or document management systems. The software development kit (MEAP SDK) also enables third party vendors to develop systems based on your requirements. You can even create workflow tasks using the MEAP Connector with the PC-based Function Flow Editor tool.

ADVANCED
MANAGEMENT

The imageRUNNER ADVANCE makes it easy to monitor and optimize your company's output.

Centralized Remote Control

Using the Remote User Interface, your IT managers and system administrators will be able to control and manage output devices without having to travel to each machine to check machines or update their status.

eMaintenance

Canon's unique eMaintenance allows intelligent remote administration of your imageRUNNER ADVANCE device. Remote meter readings provides real-time tracking, while the automatic fault reporting and consumables tracking instantly alerts Canon Customer Care for proactive actions such as accurate device maintenance or toner replenishment. In short, eMaintenance provides you with more up-time, convenience and greater productivity.

* eMaintenance works with most Canon copiers, printers and multifunctional devices. For more information on what models are supported, please contact Canon.

ADVANCED SECURITY

Safeguard your business' sensitive documents without compromising on quality or speed.

Access Management System allows restriction of various features of copy, print, fax, scan, Mail Box by user, group or job function. You can even limit access for specific functions such as copying.

Removable HDD Option enables hard disk drive to be removed and placed in a secure location when not in use.

iEEE2600 Standard Conformity meets the industry requirements for hardcopy security in medical, finance, and other office environments.

HDD Encryption and Erase encrypts information before it is written to the hard drive, and permanently removes it by overwriting when the job is complete.

Document Scan Lock embeds hidden tracking information in a document to restrict unauthorized copying or scanning, and track the origin.

Department ID restricts machine usage to those users with a valid ID and password.

Card Authentication controls access of devices in the office to authorized users with the use of optional ID cards.

Canon's imageRUNNER ADVANCE 4000 series is more than a black and white multifunctional device - it represents an integral innovation that is made for the heart of your business communication.
